

The Department of Preventive Medicine (DPM) in the Feinberg School of Medicine at Northwestern University seeks candidates for a postdoctoral position in the areas of Molecular Epidemiology and Cancer Biology. Applicants should have a doctoral degree in chemistry, biochemistry, environmental science, or a related field. Successful candidates will participate in NIH-funded research investigating links between environmental exposures, cancer, and other adverse health outcomes using protein adductomics and other cutting edge analytical approaches to investigate the interplay between environmental exposures, biological response, and their roles in breast cancer etiology. Candidates should have expertise in biological mass spectrometry, protein isolation, exposure assessment, and strong writing skills. Candidates with strong interest and experience in metabolomics and/or proteomics are preferred.

Postdoctoral Fellows will be mentored to pursue independent research careers. The Division of Cancer Epidemiology and Prevention in the DPM, and the Robert H. Lurie Comprehensive Cancer Center, offer outstanding training opportunities for multidisciplinary Environmental Cancer Epidemiology research. To be considered for this position please send a curriculum vitae and names and email addresses of three references to the Lab PI: Dr. William Funk ([w-funk@northwestern.edu](mailto:w-funk@northwestern.edu)). Application review will begin immediately but will continue until the position is filled.
